AnanseText System	7
-------------------------	---

Introduction

This file aims to provide details on the requirement specifications for the Automating Text for DataFlow Solutions using AnanseText. AnanseText project is a bespoke one.

AnanseText provides users with Data Management, Text CleanUp, Word Manipulation, Text Transformation, Text Analysis and File Operation.

Functional Requirements

Authentication

This system has no form of authentication. The user just logs in and starts processing their text.

Data Management

Allows users to store information with a unique ID. Users can delete and update information associated with a particular ID.

Text CleanUp

Allows users to remove duplicates, unnecessary punctuations and special characters in a text.

Word Manipulation

Allows users to sort words alphabetically, replace words, shuffle words and even generate acronyms.

Text Transformation

Allows users to properly capitalize a text, apply lowercase and title case to a text.

Text Analysis

Allows users count unique words, word frequency, occurrences of a text, and even finds the longest word in text.

File Operations

Allows users to load a text document from their devices, edit them and save it to their device. With saving, you have the opportunity to rename the text file and choose a location to which the file should be saved

Non-Functional Requirements

Data Requirements

Your (User) system must have the non-functional requirements that conform to the ones detailed in this section.

Data stored on the system

There is no data stored on the system. When you close the console after performing all the types of your text manipulations, you can either save the manipulations to your local system or you lose everything.

Performance Requirements

The system must be able to:

- Cope with unlimited actions per minute.
- Store and process commands.

Constraints

Hardware

The system must run on a system with a minimum hardware specifications of:

- 1 GB RAM
- Intel Core i3 6th Generation and any equivalent or higher
- 10 GB or more free disk space

Glossary

AnanseText

The name “Ananse” was inspired by Akan Mythology which means masterful.
